

Total Textile Solution

introduction

Prime Sourcing is one of the leading textile sourcing company that came into existence in 1998. We primarily deal in textile related products such as Yarn, Home Textiles, Bath Accessories & garments.

Our Merchandising & Sourcing services is managed by professionals of the trade providing the best services in placement of orders, pricing according to the market trends, controlling and following up the status of running orders, to monitor shipments in time etc...

Since we are in a very competitive business, we have also reached into other regions as our international experience allows us to manage sourcing successfully beyond Pakistan in manufacturing countries like China, Bangladesh and the Middle East. Thus offering sourcing opportunities to our customers internationally.

We are also providing quality control services to our valued European and American customers for their running orders in Pakistan. We have a team of qualified Quality Auditors managing our running business and making sure that the product is being made according to the specs and quality standards. We follow the same pattern which is being used globally by top inspection companies which is AQL standards from level 1.50 to 4.00 depending on articles and brands.

We do independent pre-shipment inspection of goods which helps identify potential product defects or inconsistencies in batch quality. This is a simple highly effective way of safe guarding your company against costly import and expensive product recalls. These inspections can be performed on site before and after production.

In short are logo says it all "Total Textile Solution".
